7. HANDLING AND STORAGE

Handling: When using do not eat, drink or smoke. Avoid inhalation of fumes/vapors from hot rubbers, compounds and vulcanizates. Wear gloves and wash hands after handling.

Storage: Store in a clean, dry, dark area to maintain product quality. Keep in original containers or use black covers to protect from artificial or natural light. Outdoor storage should be avoided; the preferred storage temperature is 15-25 C. NFPA Class IIIB Storage, Flash point > 200F.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Limit Values Not defined for this material. Components: Exposure limits for talc as follows:
ACGIH TLV: 2 mg/m³ Respirable Dust
OSHA PEL: 20 mppcf PEL TWA

Engineering controls A ventilation system should be installed where processing at high temperatures e.g. vulcanisation, is carried out and where bales are being ground or machined. Local exhaust ventilation is recommended during all hot processing operations.

Personal protection
General General hygiene considerations are appropriate when used as recommended. The following precautions are recognized as common good industrial hygiene practice. Emergency conditions may require additional precautions.

Respiratory Not normally required at ambient temperatures. Avoid inhalation of fumes, vapors and dust from hot rubbers, compounds and vulcanizes. If processing in area where ventilation is inadequate or ignition has occurred, wear a NIOSH-approved organic vapor respirator.

Eyes & Skin Wear heat resistant gloves, arm protection and face shield when working with hot material. Avoid contact with eyes and skin and wash thoroughly after handling and before eating or drinking.
